EDUCATION

Singapore University of Technology and Design | Sep 2024-present

BEng, Engineering Product Development. Specialising in Computer Engineering; minor in Human-Centered Design.

Temasek Polytechnic | Apr 2019-May 2022

Diploma in Biomedical Engineering, with Merit.

EXPERIENCE

Moxin (Huzhou) Technology | Backend Developer | Oct-Dec 2025

Developed the backend pipeline for a Blender plug-in that turns concept sketches into editable 3D models, supporting designers' workflows.

KOKONI | Product development collaboration

Worked on Mixin, a CMYK paint-mixing concept, and an AI-assisted sketch-to-3D workflow through the TIIDE programme.

CellWave Technologies | Research Assistant | Sep 2021-May 2022

Built a Python computer-vision program for automatic cartridge alignment. Proposed and iterated PLA and resin PDMS moulds, creating a workflow adopted into standard procedure.

SELECTED PROJECTS

Verbasense: classroom feedback combining AI-assisted cues and a study-light concept to help students surface confusion.

Snoreless: positive-pressure oral-device concept; Merit & Best Poster Award.

Solar Powered WBGT Monitor: solar-assisted outdoor heat-stress monitoring.

LiftOff: a button-operated rising-seat prototype intended to assist standing.

SKILLS

Python; computer vision; embedded systems; CAD and 3D printing; SolidWorks, Creo and Fusion; prototyping; human-centered design; microfluidics and PDMS fabrication.

LEADERSHIP & RECOGNITION

Secretary, NODE (SUTD EPD Executive Committee); Strategic & Events Lead, SUTD Healthcare Innovation Club; Honorary Secretary, IES-TP Student Chapter.

SUTD Undergraduate Merit Scholarship; first prize in the Design Thinking & Innovation 'AI as Tool, Teammate' competition; Most Technically Robust Design Award; Baby Shark funding for MIXIN and PATCHUP; TIIDE scholarship.
