

SnoreLess Anti-Snoring Oral Device

Background

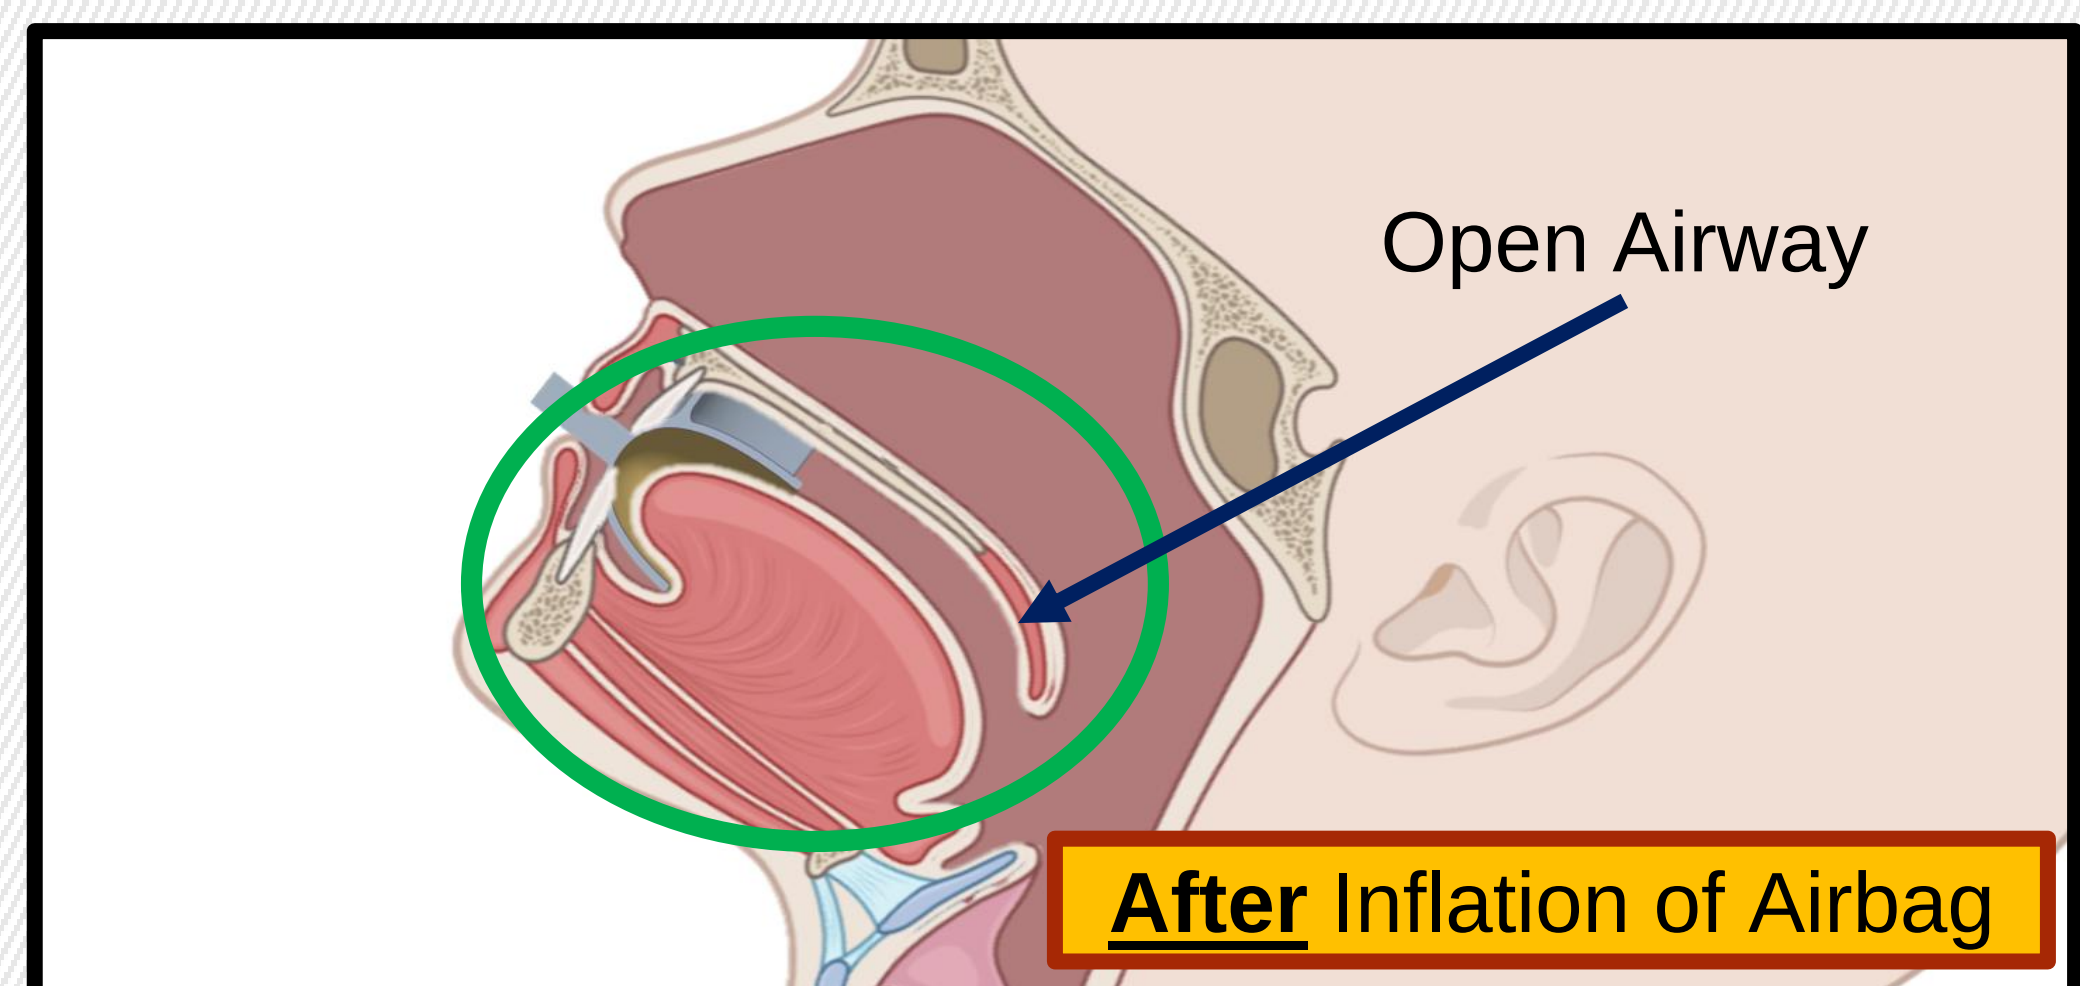

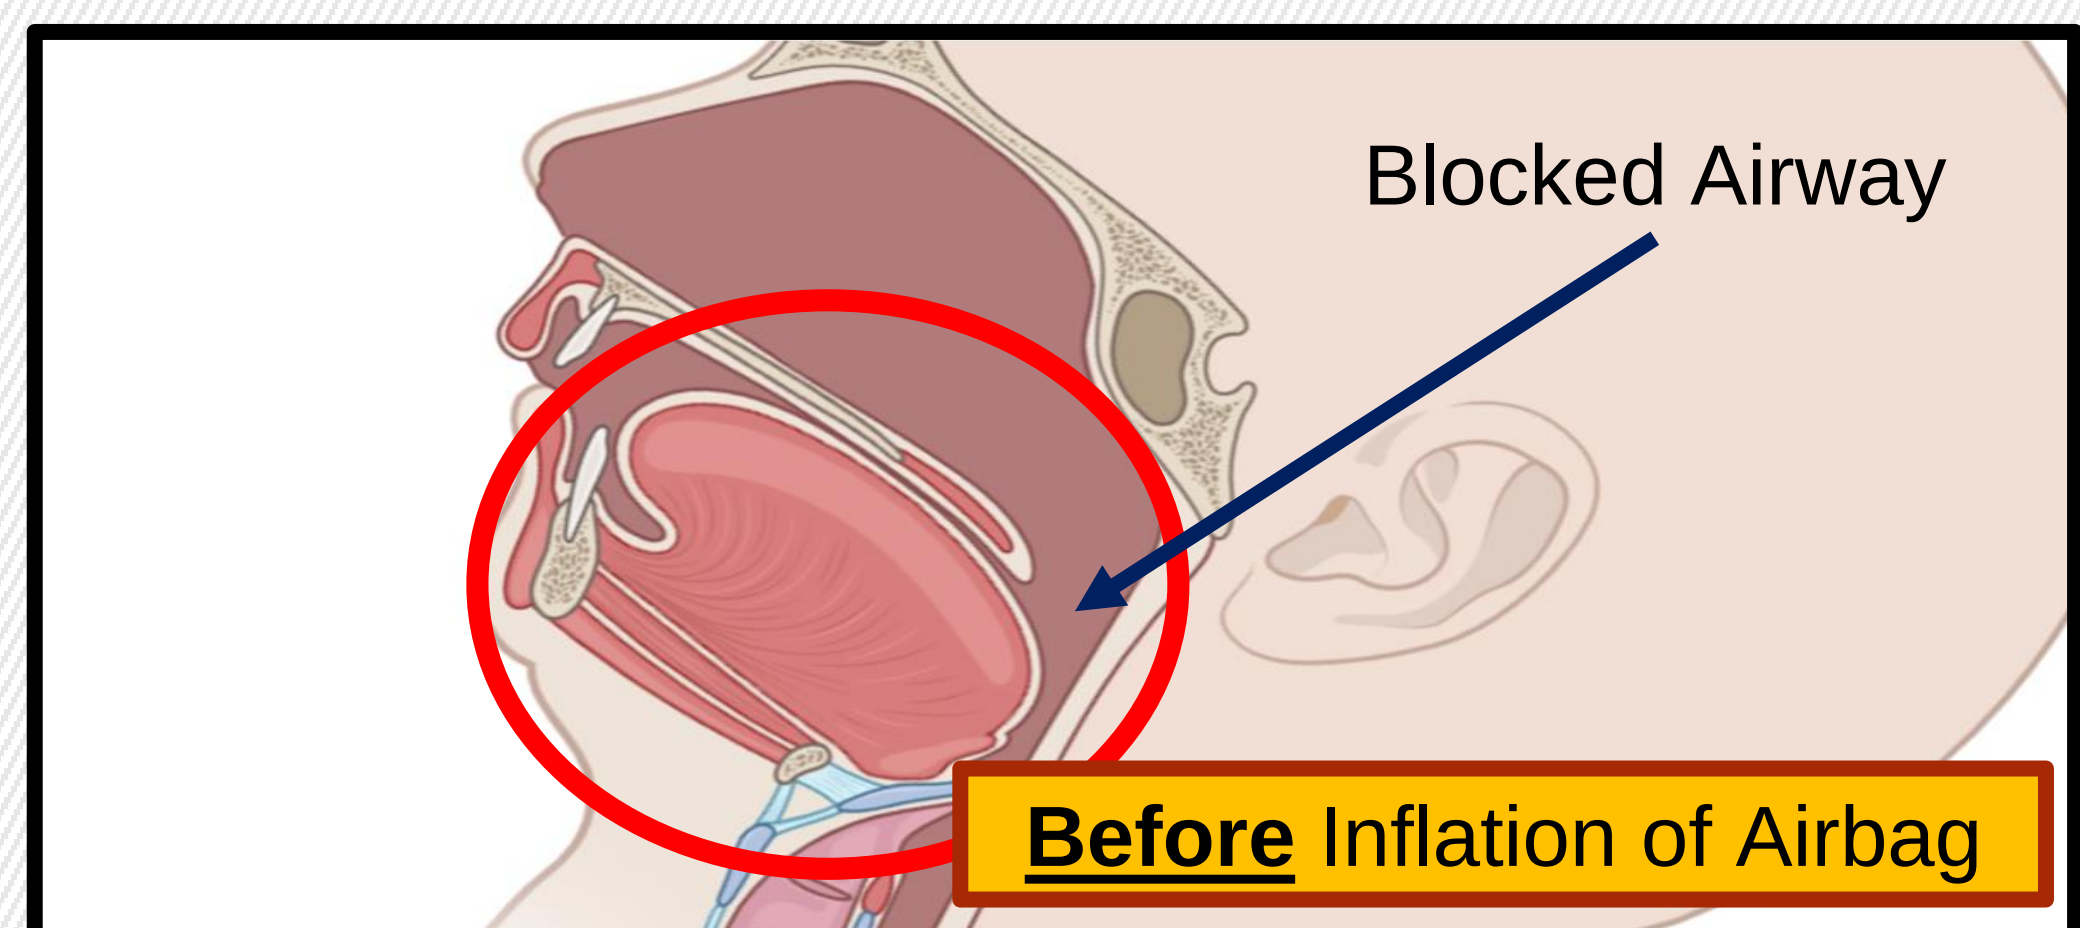

Due to sleep apnoea, patients tend to have a destructive low-quality sleep and affect others with their snores around them. This may cause serious underlying health issues in the long-term like high blood pressure, stroke, diabetes and many more.

Project Description

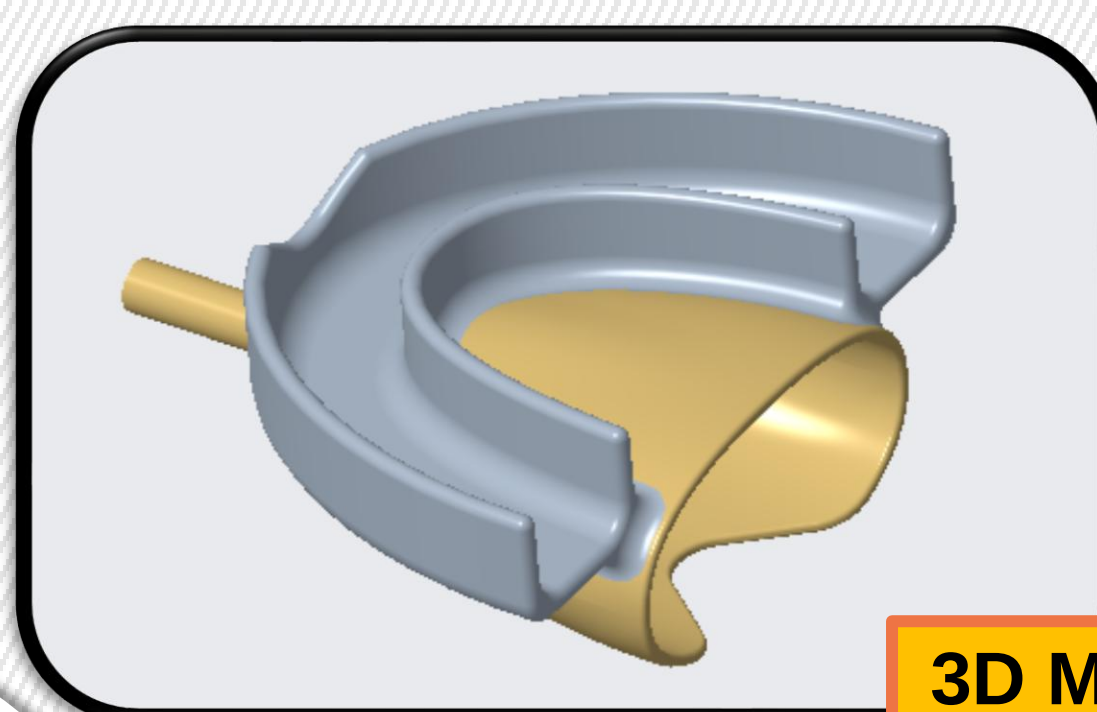

The objective of this project is to develop an oral mouth device to help patients with snoring conditions and obstructive sleep apnoea.

This device aims to help the patient to have quality sleep and not to disrupt others with their sleeping conditions.

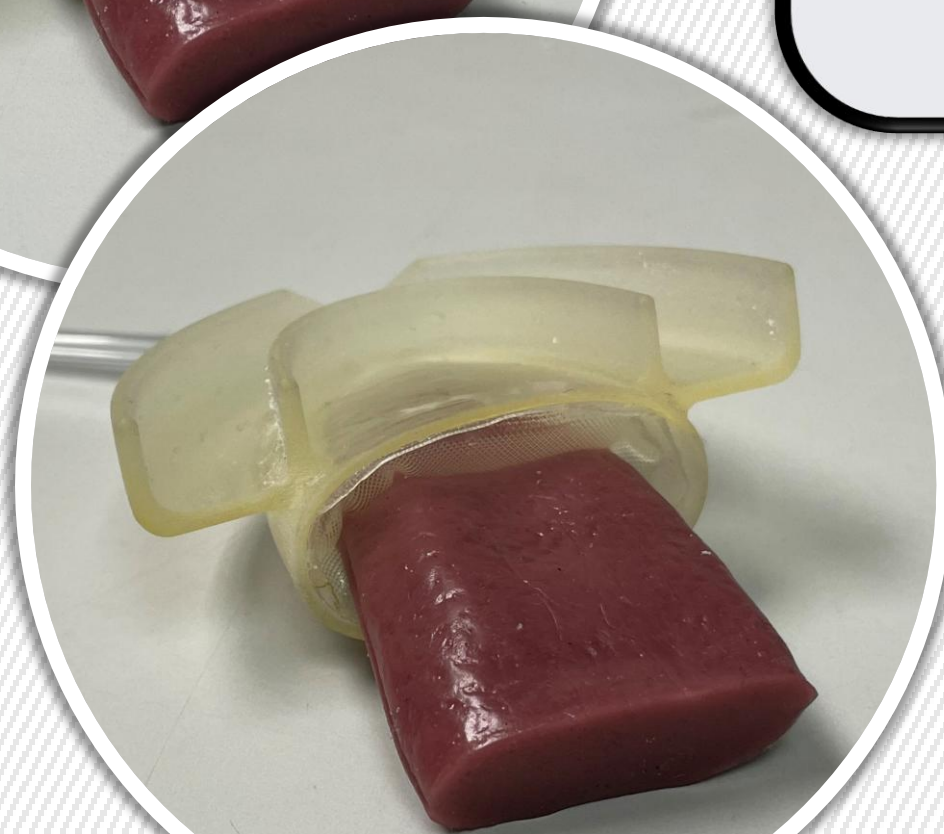

How it Works?

Before Inflation of Airbag

3D Model

After Inflation of Airbag

Printed Model

★ Key Features ★

- ✓ Prevents tongue sliding back towards throat
- ✓ Prevents snoring
- ✓ Ensure quality sleep
- ✓ Modulated air pressure for comfortability
